THE STORM WE FACE

Sound the alarm

President Donald Trump did not create climate change, but he is the nation's biggest denier that it is real. As the "so called" leader of the free world, if he is too ignorant to know or want to learn the facts, he should at least listen to the experts such as the United Nations, <https://research.un.org>, the IPCC (Intergovernmental Panel on Climate Change) global warming special report, <https://www.ipcc.ch> that is sounding the alarm, "We must act now!" CNN reported on social media yesterday, December 5, 2018, that carbon emissions was at an all time high.

<http://watchingamerica.com/WA/2018/10/26/planet-trump-hollow-lectures-on-civility/>

Politico reported, "President Donald Trump's stance on climate change conflicts with the opinion of the majority of American voters." 58% majority agrees with the scientific consensus and disagrees with President Trump, according to

"ONE OF THE PROBLEMS THAT A LOT OF PEOPLE LIKE MYSELF, WE HAVE VERY HIGH LEVELS OF INTELLIGENCE BUT WE'RE NOT NECESSARILY SUCH BELIEVERS."

a poll taken by Politico. It has been reported, when asked about whether he'd believed the report, this is what he said. "Overall, the report is fine, but I don't believe it. According to a Washington Post interview last week, Trump said, "One of the problems that a lot of people like myself, we have very high levels of intelligence but we're not necessarily such believers." That sounds like he has climate change going on

CARBON EMISSIONS AT AN ALL TIME HIGH

The new government report said, "It's not about the absolute temperature or the absolute amount of CO₂ in the atmosphere. It's all about the rate of change. The rate of temperature change is pretty fast this time, and the number of species that go extinct is a direct function of the rate at which the temperature changes. "We're seeing serious effects even within a single human lifetime."

in his brain. He has "high levels" of other toxicity, that he needs to act now on or experience psychological and political self-destruction. He also added, "As to whether or not it's man-made and whether or not the effects that you're talking about are there, I don't see it." I say, "Have you

GREENHOUSE GAS

According to Ozy, an online publication, emissions of the greenhouse gas are expected to climb between 1.8 and 3.7 percent this year, according to a report by the Global Carbon Project. The study blames much of the rise on coal use in China and India. President Trump claimed that "he had ended the war on American Energy and beautiful clean coal." The full video can be seen at

(PBS Dire Warning on Climate Change Video)

The news comes as delegates from nearly 200 nations meet in Poland to discuss implanting the Paris Agreement, (that our president pulled out of), in hopes of cutting CO2 emissions 20 percent by 2030, although I think that will take a Divine Intervention

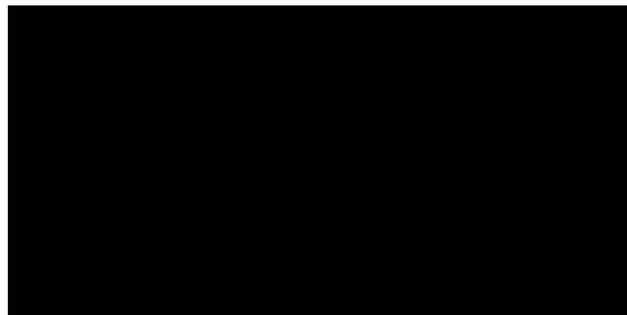

DIRE WARNING

A new report says climate change will cost American Lives and do grave danger to our economy quicker than you think, Mr. President.

Act Now

As of late, President Trump seems to be changing his tune by saying, "**Climate Change is not a hoax,**" but who knows? Just as he thinks the climate will change back on its own, he may very well flip-flop, on his opinion. Why? **Because he just doesn't see it!** He doesn't see the fires, rainstorms in California? He doesn't see the ice and snowstorms from the Midwest to the Carolinas? He doesn't see the Tsunamis throughout the world? He doesn't see the sinking cities, from Tokyo to New York? PBS did a documentary entitled "*Peril and Promise,*" at <http://www.pbs.org>. The big question is, "Is he dumb, deaf, and blind?" As mentioned previously, the

no shame?" You know that old saying, "You won't see the snake until it bites you on the you know what." **ACT NOW!**

IPCC

Special Report on Global Warming says, the impact of global warming is happening to fast for any species to adapt to the changes, therefore the impact is irreversible. Many animals will become extinct and if they are gone, then no food, and if no food, then there will be massive starvation and if massive starvation, billions of people will die. They said, "We need political leadership to immediately cut emissions across all sectors of the economy, in order to limit warming to 1.5 degrees Celsius. Anything over 2 degrees Celsius will be **too late**. You

can find the full report on "*The Effects of Climate Change*." <https://www.wwf.org.uk>

OH! IT'S REAL, MR. PRESIDENT!

A new report says climate change will cost American Lives and do grave danger to our economy quicker than you think.
